Package of 3 Face and neck \$750

6 Face and Neck \$1195

10 Face and Neck \$1900

Add Decollete for \$99, Hands \$50 or Both \$120

Most clients are treated monthly some are treated on a every other month basis. To get your best results please follow your skin care calendar and practitioners treatment plan.

What to expect: Clients will be numbed for 30 minutes before treatment is performed. After 30 minutes numbing gel will be removed and skin will be sanitized. Treatment will then be performed and will take approximately 30 additional minutes. Clients will be comfortable throughout treatment. Skin will feel sunburnt after treatment, usually subsiding within 24 hours. Typically redness completely subsides within 24 hours but in some cases may take

several days to completely go away. Clients can experience some mild to moderate bruising that can last for several days. This is not typical but can happen in some cases and is NOT reason for concern.

Clients need to be aware that picking up a secondary bacterial infection is more likely for the first three days after a treatment. If you think you have a secondary bacterial infection you need to seek medical treatment for this. Also clients that are prone to or carry the herpes virus (that causes cold sores) need to be aware that a SkinPen treatment may cause a cold sore outbreak. Please speak to your medical doctor if you need to be on preventive medications before a treatment. Also we will not perform ANY skincare treatments if an active bacterial, cold sore, or shingles outbreak is present.
